DESIGNER

Hello! My name is Kerri and I am a designer here for the SimsVIP. My job is to essentially make things look good. I do info graphics for the site and now these game guides! So I really hope you enjoy it.

I have been a fan of the sims since the first game my favorite thing to do in the Sims 4 is build stuff and customize sims. Thank you for the support on this game guide and I hope to provide you with high quality PDF's like this one in the future :)

TWISTEDMEXICAN

CODE GURU

I'm TwistedMexican, or TwistedMexi depending on who you ask. The Sims was the first real computer game I played, and one of the few to have a lasting impression on me. I remember being the one looking up the classic cheats like 'motherlode' and 'move_objects on', so it's been a weird ride to be the one publishing the extra cheats for Sims 4. It's a great community and I'm glad to be part of it.

INTRO TO THE CHEAT GUIDE

Please note that while using cheats can make for a fun gameplay experience, they may also cause gameplay issues. Always be sure to save your game prior to using cheats to prevent you from losing any progress.

ENTERING CHEATS

Cheats are entered in the command console which can be brought up by pressing **CTRL + SHIFT + C**. When not in use, hide the cheat console pressing **ESC**. Most cheats require `testingcheats true` to be enabled prior to entering the actual cheat, so it is best to just type that in before attempting to use any cheats.

 The game automatically sets back to `testingcheats false` when you travel. Any time you see a loading screen, you will have to enter `testingcheats true` once again before enabling any cheats.

 The Sims 4 allows for copy and pasting to the cheat console. Feel free to copy the cheats directly from this page, and paste them to your game. Be aware though that for some cheats you will have to change the default {bracket examples}.

UNOFFICIAL CHEATS

The following cheats are ones that have been uncovered by **TwistedMexican**, and although were not “officially” confirmed to be “100% safe” for use, have now been OK’d by developers. Despite this confirmation, always remember to exercise caution when using these cheats by testing them on a random household first.

GETTING A SIM ID

Some cheats require you to have the the Sim ID instead of a Sim’s First and Last name. Use the following cheat to acquire their ID. The ID is the long numerical string at the end.

CODE	EFFECT
<code>sims.get_sim_id_by_name (first name) (last name)</code>	Displays your Sim's Identification Number that is used for some cheats.

ASPIRATIONS

CODE	EFFECT
<code>aspirations.complete_current_milestone</code>	Completes the selected Sim’s current milestone while receiving the corresponding satisfaction points.
<code>sims.add_buff Points (followed by)</code> <code>sims.remove_buff Points</code>	Adds 100 satisfaction points. The two cheats must be typed as a pair to add more satisfaction points.

CAREERS

CODE	EFFECT
<code>careers.promote {NameOfCareer}</code>	Promotes a Sim by one level in their career. Any careers containing multiple words should contain no spaces e.g. <code>careers.promote TechGuru</code>
<code>careers.demote {NameOfCareer}</code>	Demotes a Sim by one level in their career. Note that sims at the first level a career/career branch will be fired. e.g. <code>careers.demote TechGuru</code>
<code>careers.add_career {NameOfCareer}</code>	Adds a career to the selected Sim.
<code>careers.remove_career {NameOfCareer}</code>	Removes the career from a selected Sim.
<code>careers.promote Gradeschool</code>	Raises a Child’s Grade Performance
<code>careers.promote Highschool</code>	Raises a Teen’s Grade Performance

SPAWN FIRES (NEEDS SIMS 4 GET TO WORK)

The following cheats and descriptions come directly from TwistedMexi's Cheats Page

CODE	EFFECT
<code>stats.set_stat commodity_Buff_BurningLove_StartFire 7</code>	Spawn a Fire. This has a 15% chance of spawning a fire and igniting your active sim each time you enter it. Copy-paste the command until you ignite. If you want to keep your sim alive have a shower ready.
<code>sims.remove_buff Buff_Fire_RecentFire</code>	Reset Chance for Fire. After a fire has occurred, 2 full sim days need to pass before the cheat is usable again. The command below will remove this timeout immediately. Note if combustion is still active, your sim could re-combust. See below.
<code>sims.add_buff BurningLove</code> <code>sims.remove_buff BurningLove</code>	Remove Combustion chance. The combustion command lingers with your sim, meaning after the timeout runs out or is removed, your sim could spontaneously combust at any point in time. Use these two commands to remove the combustion chance.
<code>objects.gsi_create_obj 0x0000abd9</code>	Scenic Fire. If you want to keep it simple, you can spawn a single flame near your sim with this command. It will not spread, nor ignite your sim or nearby objects. It will disappear on it's own.
<code>sims.add_buff BurningLove</code>	Increases your chances of causing a fire for 4 hours.

RETAIL SKILLS (NEEDS SIMS 4 GET TO WORK)

In The Sims 4 Get To Work, retail owners have the ability to hire employees with the Maintenance, Sales, and Work Ethic skill-sets. These skills range between levels 1-5, and not every employee will top off in all three.

To ensure your employees are as top notch as they can get, you can create your own potential employees that show as “available for hire”. To create and hire employees who are at the top of their game, follow these steps:

THERE ARE 4 WAYS TO MAKE THIS CHEAT WORK:

- Create a new household in CAS and merge them with your current household
- Add Sims to your exiting household via The Sims 4 Gallery
- Open and play a new Household in your neighborhood
- Split your current household and move them to another lot in the same town

Once you have successfully added potential employees to your current world, select each of the Sims you would like to hire, and use the cheats below to increase their retail skill-set. Save the game and then resume hiring employees in your original saved game. Any Sims who have an increased skill-set will now be available for hire in the “Manage Employee” option on the register.

CODE	EFFECT
stats.set_skill_level retail_workethic {#}	Changes employees workethic skill where {#} is a number ranging from 1-5.
stats.set_skill_level retail_maintenance {#}	Changes employees maintenance skill where {#} is a number ranging from 1-5.
stats.set_skill_level retail_sales {#}	Changes employees sales skill where {#} is a number ranging from 1-5.
