**DESIGNER**

Hello everyone! My name is Ines and I love spending my days playing the Sims as well. I am a legacy player and hopeless builder but I occasionally try it anyways. I have been playing this great game since Sims 1.

I also love graphic design and especially fanart. So it is great bringing my two passions together to work on these game guides for you. I hope you enjoy and find it helpful with your gameplay.

## SCARLET TESTING AND INFO GATHERING

I'm a wife and mother. I've been playing The Sims series since 2000 when the first one was released. I fell in love with it and have been playing ever since. I started modding in Sims 2 and continued to do so for Sims 3 and Sims 4.

Other games I love to play are the Dragon Age series, Final Fantasy, and World of Warcraft. When I'm not gaming I enjoy photography, cooking, and swimming.

## CREATE-A-SIM OUTFIT FILTERS

Three brand new clothing categories were added to The Sims 4 with the pre-seasons game patch. With The Sims 4 Seasons installed, two of these categories protect Sims from the weather. The third is exclusively for toddlers.

“Hot Weather” and “Cold Weather” filters are now available in CAS. These categories allow you to choose clothing that shields Sims from hot and cold weather elements. Sims can die by freezing and overheating when [Temperature Effects](#) are enabled, so it’s important that they have outfits set for the weather.

- Any outfits assigned to Sims in these categories will shield them from the elements. If you want your Sims to stay warm wearing bikinis during winter, then so be it.
- The game will automatically set default clothing items in these categories to ensure Sims are protected when they go outside. You can take your Sims into Create-a-Sim to change these outfits at any time.

# NEW CLOTHING CATEGORIES

The 3rd category is Swimwear for Toddlers. The Sims 4 Seasons introduces a new [Kiddie Pool](#) object Toddlers can swim in, so they now have a dedicated category for swimwear.

## MONEY TREE

The Sims 4 Seasons introduces a fan favorite: **The Money Tree**. With a little work and some patience, it can prove to be a very lucrative investment.

The Money Tree seed can be purchased via the Aspiration Rewards Store for **5,000 Satisfaction Points**, and grown in all four seasons. It may take time to gather all those satisfaction points, but it's worth it!

Growing the money tree is half the fun. The Money Tree takes about 7 days to fully bloom as a golden money tree, and will produce up to \$22,000 Simoleons daily, depending on the quality of the plant. Sims cannot harvest the money fruit from the trees, so unless they purchase more seeds, they will only be able to Sell them for simoleons.

- Moving a “ready to pick” money tree into the Family Inventory will yield 5 money tree fruits. This is the only way to get additional seeds without paying for them.
- Money Trees produce more Simoleons as they evolve and increase in quality. Using the “Take Cutting” interaction on money trees reduces the amount of Simoleons.
  - Normal Quality (\$8,000)
  - Nice Quality (\$11,500)
  - Excellent Quality (\$15,110)
  - Magnificent Quality (\$18,670)
  - Perfect Quality (\$22,225)

## GARDENING CAREER

Life can't be all about holidays and snowball fights either. Eventually you may want to send your Sim to work to earn those sweet Simoleons. There is a brand new career for them to explore in The Sims 4 Seasons called the Gardener. When you accept the job you'll be prompted to get a jump start on your first work from home assignment.

Like the careers added in the [City Living Expansion Pack](#) (Critic, Politician, Social Media) your sim has the option to work from home. An hour before your shift starts you will get a text alert on your sims phone that allows you to choose whether you'd like to work from home or go to work.

If they choose to work from home, they'll be assigned a work from home assignment. Completing this assignment will affect their job performance (potential to be promoted) and their pay. You're only given one assignment a day and it is usually something simple like "buy seeds" or "harvest harvestables". If you're working in your garden you shouldn't have any problems completing the task.

If they choose to go to work they will disappear off to Peter's Petals and Pods Landscaping for the duration of their shift. Occasionally you'll get a pop up about a decision to make at work that can affect your job performance. They are pretty entertaining, from beheading topiary to feeding cowplants, so I won't spoil anything for you. There aren't any drastic consequences to the choices you make either. It is just fun game play.

*Female and Male Gardening Career Outfits  
(Level 1-4)*

# GARDENING CAREER

It is fairly easy to promote through the early levels of the gardening career. You only need to level up your gardening skill.

TITLE	SALARY	DAILY SCHEDULE	PROMOTION REQUIREMENT	REWARDS
Dirt-Digger	\$20/hour	Sun, Tues-Thur, Sat, 8am - 3pm	Level 2 Gardening Skill	None
Soil-Sifter	\$21/hour	Sun, Tues-Thur, Sat, 8am - 3pm	Level 3 Gardening Skill	\$300 and Starter Vegetables
Seed-Scatterer	\$23/hour	Sun, Tues-Thur, Sat, 8am - 3pm	Level 4 Gardening Skill	\$400, Starter Fruits, and Garden Planter Box
Leaf-Cutter	\$25/hour	Sun, Tues-Thur, Sat, 7am - 2pm	Level 5 Gardening Skill	\$500, Seasonal Summer Plants, Sprinkle-O-Matic 2001, and #1 Mom Wall Decal

Once you've reached level 5 of the Gardener Career you'll be given a choice of which career branch you wish to pursue: [Botanist](#) or [Floral Designer](#).

# GARDENING CAREER: BOTANIST

The first career branch option you can choose is the **Botanist career**. Botany is the science side of plants so your sim will devote their time analyzing plants, writing scientific papers or trying to earn research grants. Salary wise the Botanist branch is very lucrative and if you have a high logic skill it is easy to promote. Once you have maxed out your gardening and logic skills you'll have significantly better chances at earning research grants. Overall there is nothing overly exciting about the Botanist career, but the ability to work from home, good salary and easy promotions, make this a great career choice for your sim.

*You'll find new interactions on the computer for the Botanist career branch.*

# GARDENING CAREER: FLORAL DESIGNER

The alternative career branch option is **Floral Designer** which incorporates the Flower Arranging Table. You'll need to start leveling up your Floral Arrangement skill to promote through the career branch but this is easy to do. If you already own the Get to Work expansion, you might even consider opening a Florist shop and choose to "work from home". This allows you to simultaneously run a retail store and get promoted through the Floral Designer career branch.

To begin crafting an arrangement, select the flower arrangement table and choose “Make Arrangement”. Sims can choose a specific flower, or use the “All” option to see a list of available arrangements. If the “Use fresh Ingredients” box is checked, it will use available flowers in a Sim’s inventory to save money. Sims can also store flowers in the flower arranging table.

# FLORAL ARRANGEMENTS

When Sims craft a new arrangement it will have a “Pristine” status by default. Unless Sims scent the arrangements with Bluebells, they will slowly begin to wilt. After 24 hours, the arrangement will wilt to a “Normal” status, and after 48 hours will become “Wilted”. Wilted arrangements will be surrounded by flies, and be downgraded to poor quality.

By default, all completed arrangements are crafted with the default floral foam base. Sims can click to choose any of 18 decorative vases. Vases do not affect the value or quality of the arrangement. They are purely decorative.

Once a Sim has at least a Level 3 in the Flower Arranging Skill, they will unlock the ability to Scent Flowers. Scenting can only be done at the flower arranging table, and requires that an arrangement is of excellent quality. Sims can use the “Scent With” or “Scent with Rare Flower” interactions to use this feature on flower arrangements. Rare Flower scents require at least a level 7 in the Flower Arranging Skill, and the flowers must be in a Sim’s inventory in order to use them as a scent.

Scents will activate different effects on Sims. These effects will either be available directly by clicking on the flower, or by gifting the arrangement to other Sims. Moodlets obtained by a scent effects will wear off after 2 hours.

## BEEKEEPING

The Sims 4 Seasons introduces Beekeeping. Burtie's Bee Box can be purchased for \$265, and is a must for aspiring gardeners. This object allows Sims to interact with bees, harvest and sell honey, pollinate nearby plants, create new recipes, and more.

One of the first things to know is that Sims can build relationships with the bees. Using the “Bond with Bees” interaction will help the relationship grow, and in return, Sims will receive better quality honey from the bee box. Relationships, Honey Amounts, Activity Levels, and Grumpiness, be tracked by hovering over the bee box.

Having a good relationship with Bees increases the quality of the honey they produce. In return, this increases the value of the honey. Honey can be collected every 7 hours, but it takes a full 24 hours for the bee box to be completely full.

*The following levels of Honey, Activity, and Grumpiness are possible:*

- **Honey Amount**
  - Full (Yields 3 Jars)
  - Partially Full (Yields 1 Jar)
  - Empty
- **Activity Level**
  - Active
  - Dormant
- **Grumpiness**
  - Calm
  - Irritated
  - Enraged

# BEEKEEPING

Their grumpiness level fluctuates daily, but bonding with them will help calm them down a bit. When bees are irritated or enraged, they are more likely to attack and sting Sims. Avoid purposely disturbing them during this time.

- Wearing the Beekeeper Suit will protect Sims from violent sting attacks
- Having a **Crocus Scented Flower** within 5 feet (grid tiles) will keep bees calm.
- Eating honey out of a jar will grant Sims a special moodlet that protects them from extreme weather conditions for 4 hours. Freezing or Overheating? Eat honey!
- Bees are dormant during winter, so they will not exit the bee box on their own, nor will they produce any honey. Sims are still able to interact with them though.

# BEEKEEPING

When Sims are not collecting honey and bonding with bees, they can interact in a number of other ways. Here are all the available interactions included with the Bee Box:

- **Change into (and Remove) Beekeeper Suit** - Allows Sims to collect and sell honey without worrying about being stung by bees. The suit serves as protective gear against attacks, but does not allow Sims to bond or collect swarms in it.
- **Bond with Bees** - This interaction helps increase the relationship between Sims and Bees. Use this interaction first to bring up the relationship meter.
- **Collect Honey** - Sims can collect honey every 7 hours to receive 1 Jar when the box is only partially full, or they can wait a full 24 hours to collect 3 Jars when the box is completely full. Their relationship with the bees dictates the quality of the honey.

Excellent quality honey is valued at **\$61**, and Poor quality honey is valued at **\$18**. Sims can use honey to make any of the **new recipes and drinks** available in the game.

- **Collect Swarm** - When Sims have a high enough relationship they can collect swarms of bees in their inventory to perform various actions.
- **Sell Honey** - Sims can sell honey directly from the bee box. Their relationship with the bees dictates the quality of the honey. Excellent quality honey is valued at **\$61**, and Poor quality honey is valued at **\$18**.
- **Disturb** - Sims can use this interaction to purposely irritate bees. In some cases they will receive a playful moodlet, but sometimes they will be attacked and receive the uncomfortable bee sting moodlet.
- **Apply Mite Treatment** - Once in a while mites will invade the bee box. This will cause bees to become grumpy. Applying mite treatments will correct their mood.

Bees can do a lot more than pollinate a garden though. With a high enough relationship, Sims can collect swarms of bees from the bee box. Swarms are found in a Sim's inventory, and will remain there for 5 hours. Sims can then click and instruct bees to do even more:

- **Attack** - Sims can choose a target Sim for bees to attack. Sims who are attacked receive the uncomfortable bee sting moodlet.
- **Cheer Up Self With Bees** - Sims who are in less than idea moods can use this interaction to cheer themselves up.
- **Cheer Up** - Sims can use this interaction to cheer up other Sims.
- **Woo** - Sims can use this interaction to send bees off a woo other Sims. This interaction will increase friendship and romance relationship progress.
- **Send to Fetch Gift** - Using this interaction will send bees off to fetch a gift for the Sim. Bees will return with a gift box that contains collectibles from the game.
- **Pollinate Nearby Plants** - Using this interaction will send bees to nearby plants for pollination. This interaction works anywhere in the world.

Sims will have to wait two hours before collecting another swarm from the bee box. Any unused swarms will disperse from a Sim's inventory after 5 hours.

## PATCHY THE SCARECROW

The Sims 4 Seasons introduces Patchy the Scarecrow, an object that remains inanimate until Sims bring him to life. Patchy the Straw Man can be purchased in buy mode for \$450, and can be a great help for Sims who don't have much time to tend to their gardens.

When Sims first interact with Patchy, they can use the [Chat](#) and [Examine](#) interactions. He will sometimes startle Sims with his animations, but if they spend enough time getting to know him, they will build up a relationship. When the relationship with Patchy has maxed, he will unlock his outfit in Create-a-Sim for Sims to wear.

Once the relationship is maxed out, Sims will also be able to use the [Ask for Gardening Tips](#) interaction for a significant Gardening Skill boost, and the [Check Pockets for Seeds](#) interaction to collect some flowers and plants to grow in the garden...but that's not all!

Now that Patchy has a great relationship with the Sim, he will detach from his tree and come to life. Everyday at 1pm, Patchy will stick around for a few hours to help Sims tend to their gardens. Have some overgrown weeds and dehydrated plants? Patchy will take care of it all. Not only that, but Sims can even enter into a Romantic relationship with Patchy too.

## INTRODUCTION TO WEATHER

The main feature in The Sims 4 Seasons is weather. The game allows Sims to experience a variety of weather patterns during their everyday lives. The Sims 4 Seasons doesn't include a new world to explore, but each of the existing worlds have been updated for weather.

Seasonal cycles bring a variety of changes to a world. The environment of most worlds will experience gradual changes, marked by particular weather patterns, just like real life! Not all worlds will experience the same changes, as worlds like Selvadorada and Oasis Springs do not typically see snow, nor do tree leaves experience abscission. You may see browning on some random bushes or trees, but for the most part it's cloudy or rainy in winter.

# INTRODUCTION TO WEATHER

The game places weight on certain weather patterns, during certain seasons, in each of the worlds available in the game. Weather will gradually change during each season depending on how long you set the seasonal cycle for. When fall rolls around, there's less heatwaves, and more rain. When winter rolls around there's a better chance of freezing snow.

- Deviations occur in each seasonal cycle, so you may not experience the expected weather pattern every year during the same season.
- Mysterious Weather can also occur. These weather patterns are described by the game as "anything". An example would be a random dusting of snow in Oasis Springs.
- Each world also has their own forecast chances. There are three parts to a Season: *Early, Mid, and Late*. Each has a chance of producing various types of weather.
- The game does not set any specific default weather patterns for the Magnolia Promenade neighborhood ([Get To Work](#)), but based on observations, it follows the same type of weather changes seen in Willow Creek.

# NEW GAME OPTIONS

## WEATHER OPTIONS

The first thing you probably want to do when you get The Sims 4 Seasons, is experience some weather that isn't Hot and Sunny. But before you start making snow angels and play around in mud puddles, you should familiarize yourself with the new game options.

When you boot up the game for the first time, you can do one of three things; start a new game in Create-a-Sim, Load a Save, or Press Play and continue where you left off. All three of these options will lead you directly into the Seasonal Selector screen, with the exception of “New Game” that requires you to create a family first.

- **Spring** - Spring is a great time to plant your garden to take advantage of spring showers, but watch out for those mud puddles!
- **Summer** - Temperatures are climbing, so beat the heat with water balloons and sprinklers. Watch out for the thunderstorms, they can be electrifying!
- **Fall** - Gather your garden produce to make a Harvestfest feast to celebrate with friends and family. Enjoy the changing leaves (and leaf piles) before things get chilly.
- **Winter** - When you're not bundled up indoors, have some fun in the snow or on the ice. Don't forget to decorate for Winterfest and plan your New Year's resolutions!

Whichever way to choose to start the game, you will eventually be met with the Seasonal Selector screen. You can hover over each of the Seasons to view more information about them, and once you decide which season you want to start with, click the corresponding plumbob, press ok, and continue into the game.

- You will only be required to select a season once per game save. Seasons rotate with the following schedule: Spring, Summer, Fall, and Winter.
- You're not able to alter the starting season once you've selected it. The only way to change the weather or the current season is to use the Weather Control Device in buy mode. High level Handiness Skill and upgrades are required.

Once you jump into the game, the weather will represent the season you selected. Now is the best time to familiarize yourself with the Seasonal Game Options available.

# WEATHER OPTIONS

Seasonal Options can be access by clicking the options menu, and selecting the “Seasons” tab. From there you can change 4 options for the game. These changes are universal, so you won’t be able to change them for just one season or one game save.

These game options are effective immediately upon changing them. Remember that these game options are universal. Altering the settings affects every world.

- **Season Length** - This allows you to change how long each of the seasons will last. Available options are: **7, 14, or 28 Days**. This change applies universally for all seasons. Adjusting the season length will also alter or remove calendar positions, along with any events or holidays you create. The 4 pre-made Holidays will adjust on their own, but other holidays and events you have planned will be moved around or deleted.
- **Rain Options** - This allows you to choose one of three options: **Rain & Thunderstorms, Rain, or None**. Turning this option off will eliminate rain from the game all together.
- **Snow Options** - This allows you to choose one of three options: **Snow & Blizzards, Snow, or None**. Turning this option off will eliminate snow from the game all together.
- **Temperature Effects** - This option allows you to **enable or disable temperature** effects on your Sims. Weather plays a role in how Sims feel and react to weather. Sims will receive buffs and emotional reactions to weather. If you want your Sims to be able to run around in the nude during freezing weather, disabling will allow you to do that without repercussions.

# WEATHER FORECASTS

## FORECASTS

Now that you have all this out of the way, you can check the current season, temperature, and forecast at any time. The Calendar Feature and the new weather UI provide the current weather forecast. You can easily hover over the time stamp at the bottom of the screen to check information on the fly. The Calendar Feature also provides a 7 day forecast as well.

The Calendar is located on the bottom left side of the UI right next to the phone. Once this opens you can check up to 7 days of the forecast on the top left side of the panel. Keep in mind that the forecast and weather can end up completely different. Things like playing with the weather machine, and the game's own mechanics affect the weather.

# INTRODUCTION TO SEASONS

## SEASONS

The Sims 4 Seasons introduces 4 weather cycles. Spring, Summer, Fall, and Winter include new environment changes, activities, and a new way to tell your story. Each season comes with many weather patterns, so you'll see everything from Sun Snow to a Heat Wave.

- Weather and Environment transitions are also visible between seasons. Once spring rolls around, snow will slowly melt away and trees will begin to blossom.

You'll also notice that the sun sticks around longer in the summer, and sets sooner during winter time. Depending on the season, Sims will also have a variety of activities available to them, from ice skating, to mud fights, to seasonal food stalls.

## WEATHER CONTROL DEVICE

One of the frustrating parts of [The Sims 4 Seasons](#), is that it doesn't give you the ability to change the weather or season on a whim. [Once you select a season](#), you're stuck with it. You'll have to wait until all 4 seasons cycle through before getting back to square one.

*Sick of the snow? Consider traveling to [Selvadorada](#) or [Oasis Springs](#)*

You can always extend each season [using the game's settings](#), or travel away to one of the vacations worlds for a change of weather. Either way, the only way to *actually* change the weather or season in the game, is to excel at the Handiness Skill.

*Look for scorch marks on the ground. Lightning strikes may leave something special behind!*

# CHANGING WEATHER & SEASONS

The Sims 4 Seasons introduces Dr. June's Weather Control Device. This device allows Sims to change the weather in the game, but more importantly, the season. There are several different upgrade options on the weather machine, and many of them require a high level Handiness Skill. If you want to be able to change the weather, it's time to read up!

The available options on the weather control device are:

- **Change Current Weather** - This is available to all Sims regardless of Handiness Skill Level. Keep in mind that the lower their skill, the bigger the chance of failure. Sims will get zapped by this device if they're not careful. Sims with a higher Handiness Skill have more success.

- **Upgrades** - There are 7 upgrades available. Each upgrade provides new interactions with the weather machine, and Sims need at least a Level 8 in the Handiness Skill to unlock them all.
- **Handiness Skill Level 2**
  - **Climate Hydrator** - Increases success chance when attempting to create rain or snow.
  - **Gyroscope Durability** - Makes the machine more resistant to breakage.
  - **Humidity Chiller** - Increases the success chance of interactions involving snow or cold.
  - **Moisture Vaporator** - Improves the success chance of attempts to clear the skies.

*(All upgrades require 1 Common Upgrade Part)*

# CHANGING WEATHER & SEASONS

- **Handiness Skill Level 3**

- **Capacitive Efficiency** - Unlocks the ability to modify the current season's weather.

- (Requires 1 Electronic and 1 Common Upgrade Part)*

- **Handiness Skill Level 5**

- **Self Repairing Nanites** - Prevents the machine from breaking.

- (Requires 2 Electronic and 2 Common Upgrade Parts)*

- **Handiness Skill Level 8**

- **Temporal Modifier Unit** - Allows the machine to advance to any season.

- (Requires 3 Electronic and 3 Common Upgrade Parts)*

While there isn't a quick way to change the season/weather in the game, Sims can increase their Handiness Skill to experience different seasons and weather effects in the game. Also, please remember that whenever you change a Season using the "Advance Season" option, any events and holidays scheduled in your Calendar will be deleted or moved.

## LIGHTNING BENDER

Sims who spend too much time outdoors during Thunderstorms run the chance of being struck by lightning. Sims who are struck by lightning multiple times within a few hours will end up with the “HyperCharged” moodlet. This gives Sims the ability to summon lightning.

- Erratic and Storm Chaser Sims are more likely to be struck by lightning.

When Sims are struck by lightning the first time, they will receive the “Struck by Lightning” and “Supercharged” moodlets. If they are struck again within the hour, they will either be met with death, or receive the 12-hour “Hypercharged” moodlet. This moodlet unlocks a special interaction called “Bring The Lightning” used to summon lightning outdoors.

# NEW DEATH TYPES

The Sims 4 Seasons introduces 4 new types of Deaths to the game. Certain actions in the game can result in Sims losing their life. The following section details the new death types.

## DEATH BY LIGHTNING

Sims who spend too much time outdoors during Thunderstorms run the chance of being struck by lightning. If they do not seek shelter immediately, the next strike could be fatal.

Sims who are struck by lightning more than once in a short period of time run the risk of being killed. If the Sim is not lucky enough to become Hypercharged with a second strike, death is immediate. The ghosts of Sims who die from Lightning Strikes will have the appearance of “live wires” emitting electrical sparks.

## DEATH BY FREEZING

If you have temperature effects enabled in the game, Sims who spend too much time outside in the cold without proper attire will eventually freeze to death. Sims who ignore the multiple moodlet warnings and do not bundle up or seek immediately shelter will die.

- When a Sim's skin turns blue, that is your final warning to seek shelter.
- Eating honey out of a jar will grant Sims a special moodlet that protects them from extreme weather conditions for 4 hours.
- Leaving a thermostat unattended in a home can also cause Sims freeze to death. When Sims receive the "chilled" moodlet inside a home that has a thermostat, it's time to turn it off or crank up the heat.

## DEATH BY OVERHEATING

If you have temperature effects enabled in the game, Sims who spend too much time outside in the heat without proper attire will eventually burn to death. Sims who ignore multiple moodlet warnings and do not seek immediately shelter will die.

- When a Sim appears to be unable to breathe well outside and is profusely sweating, that is your final warning to seek shelter.
- Eating honey out of a jar will grant Sims a special moodlet that protects them from extreme weather conditions for 4 hours.
- Leaving a thermostat unattended in a home can also cause Sims burn to death. When Sims receive the “lethal heat” moodlet inside a home that has a thermostat, it’s time to turn it off or turn on the air conditioning.

# NEW DEATH TYPES

## DEATH BY FLORAL SCENT

Death by Flower Scent is not necessarily a new death per say, but it is a new way to kill Elders. Sims who reach **Level 7 in the Flower Arranging Skill** will unlock the “Scent with Rare Flower” interaction on completed floral arrangements. This allows Death Flowers to be used when adding a scent to their floral arrangements.

When gifting a floral arrangement scented with the Death Flower, the receiving Sim will immediately age up. This means toddlers will age into children, children to teens, and so on. But if a Death Flower scented floral arrangement is gifted to an Elder Sim, they die.

## HOUSEHOLD CALENDAR

The Sims 4 Seasons introduces the Calendar, an in-game feature that gives information on Seasons, Weather, Holidays, and Events. The household calendar can be accessed in the lower left hand side of the UI next to the telephone.

Upon opening the calendar, you will immediately notice several bits of information. The left side of the calendar displays the Forecast, and any Holidays or Events that are planned for the selected day. The right side of the calendar will display seasonal backgrounds, a 7-day Forecast, and various icons. Click any day to see specific information regarding holidays, works schedules, birthdays, and forecasts.

- **Blue Icons** represent Work/School Schedules, **Pink Icons** represent a Birthday, **Weather Icons** represent the forecast, and **Other Icons** represent Holidays/Events.
- The example calendar here displays a 7-day Seasonal cycle. If you use the **game settings** to increase the length of each season, pre-made Holidays will shift.
- If you create any of your own Holidays and Events, changing the season cycle will move them, or in some cases completely delete them.

## EVENTS

The Sims 4 Seasons completely revamps the Events System in the game, allowing Sims to plan any of the already existing events in the game through the Calendar. To create a new Event, select the “Add Event” option in the Calendar.

- Multiple Events can be planned per day - *up to 2 weeks in advance* - but they cannot occur at the same time. Once an event is created, it can only be canceled. Editing is disabled for events.
- Events can be created and planned on the same day, but Goaled Events cannot be planned during a Holiday. Events are also a one time thing. Unlike Holidays, Events will not repeat or occur again unless you specifically plan it.
- Event planning remains the same as before. The only difference is they are planned through the Calendar, and you can select a specific time for an event to begin.

# INTRODUCTION TO HOLIDAYS

## HOLIDAYS

Holidays are special days that allow Sims to celebrate with unique traditions. The Sims 4 Seasons includes 4 “Pre-made” and 8 “Surprise” Holidays, but you can also create your own personal Holidays. To create a Holiday, select the “Add Holiday” option in the Calendar.

- Only one Holiday can be planned per day. If there’s an already existing Holiday on a day you’d like to select, you can edit and cancel the holiday right from the Calendar.
- Holidays are required to be schedule at least one day in advance. You cannot create any holidays on the current day, but you can always cancel and edit them.
- Holidays will occur every year on the same day. If you create a 5-day “Summer Break” Holiday for children in the summertime, they will get those days off every year when summer cycles through again. Cancel or edit anytime.

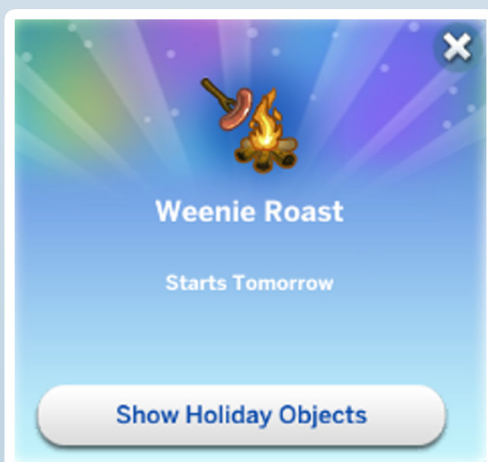

# INTRODUCTION TO HOLIDAYS

Once you enter the Create-a-Holiday panel, you have several options to customize. The following options are available when creating a custom Holiday:

- **Holiday Icon** - At the top left of the holiday creator, you can select any of the 27 available holiday icons. This icon will appear on the calendar to serve as a quick holiday reminder.
- **Holiday Name** - At the top of the holiday creator, you can write in the name of your Holiday.
- **Decoration Theme** - At the top right of the holiday creator, you can choose the decor theme of your event. You can choose any of the following options: *None, Love Day, Harvestfest, New Year's Eve, Spring, Spooky, or Winterfest*. The decor type you select will determine the type of decorations available to your household via the Decoration Box. If you choose not to have a specific theme, Sims can only decorate the exterior of their own homes, and neighboring homes will not display any exterior decorations at all.
- **Day off Work/School** - Right below the decoration theme is the school and work option. Select this box to determine whether Sims will have the day off school and work.
- **Holiday Traditions** - At the bottom of the holiday creator you will find a list of 46 Traditions. If you have [The Sims 4 City Living Expansion](#) installed, you will also have the Fireworks Tradition, for a total of 47 Traditions. Some traditions enable new gameplay options.

Once you have determined the details of your event, select OK, and the Holiday will be automatically scheduled for the day you selected. All Holidays begin at 6am and end at 2am the following day. This allows enough time to complete activities and traditions.

The day before a Holiday is scheduled to take place, a pop up notification from the calendar will remind you. It will also have a special buy mode button called “[Show Holiday Objects](#)”. Clicking this button will take you into buy mode and display a list of items that are required to complete the traditions in your holiday. There’s also a “[Holiday Items](#)” category in buy mode when the holiday begins.

# INTRODUCTION TO HOLIDAYS

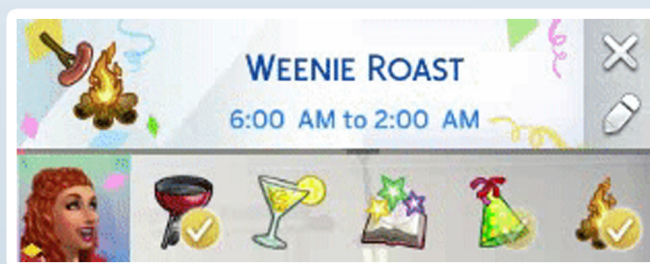

When the Holiday begins, a tracker will appear on the top left side of the screen. This will give you information on the Holiday, including the traditions that must be completed. Each Holiday can have up to 5 traditions, or none at all. Traditions are things that Sims like to do, but in some cases may ignore completely depending on their age and traits.

- Sims who LOVE a tradition will show a heart icon behind the tradition's icon.
- Sims who IGNORE a tradition will have a grayed out icon.
- Sims who have no preference will just see the icons as is.

Interactions that help complete any of the traditions will display the icon of the holiday. These interactions will help you complete what is needed in order to wrap up the holiday. Sims who complete all traditions will receive up to 500 satisfaction points as a reward.

Some traditions will require multiple interactions before being completed. You can monitor progress on the holiday tracker. Completed traditions will display a solid gold check mark, and traditions that require a bit more work to complete will display a flashing one.

## TRICK OR TREAT

When creating Holidays that include the “Trick or Treat” [Tradition](#), children and teens from around the neighborhood will knock on the door to get their sweets. Adult Sims can click on kids who knock on the door and use the “Trick” or “Treat” interactions.

- If you own [The Sims 4 Spooky Stuff](#), the game allows you to place the interactive Candy Bowl on the lot for kids to take the candy on their own. Unfortunately, it seems that this interaction is bugged and it doesn’t count towards completing the tradition.

## THE LOTTERY

The Sims 4 Seasons adds a new **Surprise Holiday** to the game called The Lottery. This Holiday will appear at random, and offers Sims in the world a chance to win big. If your Sims want the chance to become a Sim-millionaires, they will need to purchase a Lottery Ticket (\$100) from their cell phone or computer. (Limit 1 ticket per Adult Sim)

- The Lottery appears randomly in the game on Wednesdays. Sims have until 2am Thursday to purchase tickets, and the winner is drawn on Thursday at 10am. The game will generate a notification of who won The Lottery.
- Sims have a 1 in 100 chance of winning the lottery. If you have 5 Adult Sims in your household and they each purchase a ticket, the household would then have a 5 in 100 chance of winning. The game selects a random Sim during the drawing.
- Sims who win the lottery will receive \$1,000,000 Simoleons.

# MAGICAL GNOMES

Sims who choose to “Kick the Gnome” will enrage the entire crew of gnomes. Appeasement and Forgiveness will no longer be allowed for the remainder of the Holiday.

Once an angry mod of gnomes is active, their sole purpose is to destroy the lot. Sims must kick each and every gnome on the lot in order to stop the destruction. Kicking gnomes will result in random trash piles, collectibles, and Simoleons.

## Stone Essence Foundation

**\$0**

The Stone Essence Foundation shows off stone as if it were it's natural habitat. The wood top is like frosting on this stone cake.

## Click, Click, Click Chimney

**\$200**

Up on the housetop  
There's this vent.  
Out jumps Father Hol-i-day.  
Down thru' the chimn—Okay, let's be real, there's no way he's going fit into this thing... BUT your house can pass the seasons (and fireplace smoke) in style with this beautiful, homey accent piece!

## Hang This Support Beam

\$25

Wide open spaces are no problem for the robust support beam! With Sim super strength the 'Hang This' Support Beam will keep the heaviest loads propped up.

## Stand Tall Column

\$45

In today's column I will be discussing the struggles and hardships of the local squirrels. These local squirrels have been constantly taken advantage of. They have been kicked out of their local habitat and forced to retreat to the small hills of Willow Creek. This travesty must stop. It is time for the squirrels to rise up and stand tall. Keep Willow Creek Nutty!

## Simple Craftsman Railing

\$10

Craftsman isn't just a decorative arts style, it's also a lifestyle! Indulge in the simple, square blocks and straight lines of this hand-worked railing.

## Simple Slatted Stairway

\$8

Simple? Check. Slats? Check. Stairs? We have the treads—who needs risers?! Just don't drop your phone...

## Stony Steps

\$8

Do your steps have stones perched precariously upon more stones? They do now!

## Cozy Craftsman Gate

Wood, stone, and functional lighting, this gate has it all!

## Cozy Craftsman Fence

## Rustic Corbel

Hand hewn from reclaimed barn wood (from a llama farm!), this corbel adds both support and rustic style to any home.

## Square Knotty Window

\$30

The Square Knotty Window is definitely superior to the Tiny Knotty Window in every way, as long as you like clean cut lines and aren't dreaming of that beautiful arched top that is only available from the Tiny Knotty Window.

## Wide Knotty Window

\$30

Wide Knotty Window is the way to go if you want the most light in a compact package. Three panes of glass make this a perfect window in any room of your home.

## Average Knotty Window

\$30

The Average Knotty Window is just that...average. But that won't stop it from letting light into a room as it was designed to do.

## Tall Knotty Window

\$30

The Tall Knotty Window lets in as much light as it can with its lanky form, but it wants you to know that it likes its slender figure.

## Wide and Tall Knotty Window

\$30

This Wide and Tall Knotty Window isn't sure of it's place in this world, what does it have that's unique? There's already a Tall Knotty Window, and a Wide Knotty Window. It just hopes someone loves it enough to place it in their home.

## Tiny Knotty Window

\$30

The Tiny Knotty Window is quite well-behaved! It always sits right in the wall where you place it—all craftsmany and natural. Few windows aspire to this degree of discipline.

## Large Knotty Window

**\$30**

Though not as well behaved as the Tiny Knotty Window, the Large Knotty Window still obeys the rules of windowdom. Not only will it stay in the wall where it was installed, but it also allows anyone to look through it's glass panes without complaint! In addition, it boasts a rather natural aesthetic, bringing the craftsman style to any taller wall.

## Slats All, Folks!

**\$50**

A solid and perfect craftsman door. It was constructed by, Brawn Duckson, a burly man with a no-nonsense attitude and gorgeous mustache—that's how you know it's quality. He'd probably cringe at the name we gave it.

## The Greatest Craftsman (Rounded)

**\$50**

After we named the "Slats All, Folks!" door, it's creator, Brawn Duckson, insisted on naming the next one. I hereby introduce you to "The Greatest Craftsman." Not only was it made by 'the greatest craftsman,' but it also might be the greatest craftsman-style door to ever grace this fair world.

## The Greatest Craftsman (Squared)

**\$50**

So, it's a quality door. Brawn Duckson, the man who names them isn't the most creative. (He just added "squared" and 'rounded' and gave them the same name...) But he's insistent on naming them himself! He does such good work and his mustache is so enchanting that it's been allowed.

## The Smaller (But Still Great) Craftsman

**\$50**

Bring the seasons indoors with this craftsman-style door. Hand-crafted by *the* Brawn Duckson, you won't find a finer entrance to your home.

## Venue Wall Speaker: Summer Strut
